

Paint a threatened glacial landscape.

Road to Action: Paint Bow Glacier Today

Art activism bringing awareness to the impact of climate change on our watersheds, glaciers, and our Canadian Rockies landscapes & wildlife.

Today we are travelling to Bow Lake and Bow Glacier - Formed over hundreds or thousands of years, alpine glaciers provide freshwater resources for billions of people around the world for irrigation, hydro-power, ceremony and recreation. Today glaciers are under threat from rising global temperatures, which in turn leads to additional warming.

Paint your threatened Bow Glacier - Likely the source of YOUR drinking water. The headwaters of the Bow Watershed provides water to >40 communities including the Bow Valley and Calgary.
